MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT & ENGINEERING

Student Name: Sanket Mali
B.Tech – Computer Science (2023–2027)
Date of Birth: Sep 18 ,2025

Education

MPSTME, NMIMS University **2023 - 2027**
B. Tech in Computer Science
CGPA: 3.47/4.00

R.C. Patel Junior College **2021 - 2023**
HSC: 79.50

R.C. Patel English Medium Secondary School **2021**
SSC: 87.40

Projects

Smart Campus Entry Monitoring System (MERN Stack)– 2026

Developed a Smart Campus Entry Monitoring System to address long queues, manual register-based entry, and delays during peak campus hours, causing congestion at college gates. The objective was to build a secure and scalable platform for automating student entry/exit tracking with **biometric authentication, real-time monitoring,** and **role-based access control.** Built the application **using React.js, Node.js, Express.js, MongoDB, JWT, Socket.IO, Tailwind CSS,** and **Chart.js**, implementing biometric and SAP ID-based authentication, **automated entry/exit detection, Excel-based student enrollment, hosteller management, visitor logging, live analytics dashboards,** and **parent email/SMS notifications.** Designed the system to reduce manual entry time, minimize gate congestion, and improve campus security through automated real-time monitoring. The project is currently under evaluation for deployment within the college.

Wanderlust (MERN Stack) – 2025

Built a scalable Airbnb-inspired travel booking platform to simplify property discovery, secure online bookings, and host management. Designed and implemented **RESTful APIs, MVC architecture, and Passport.js authentication** using **Node.js, Express.js, MongoDB, EJS, Bootstrap, Mapbox, Cloudinary, Razorpay,** and **Nodemailer.** Developed advanced features including **interactive maps, image hosting, payment gateway integration, wishlist management, AI chatbot, review system,** and **admin dashboard** with moderation controls. Delivered a secure, modular, and production-ready application showcasing full-stack development, third-party API integration, and scalable system design.

Employee Directory App – 2024

Deployed a cloud-based Employee Directory application to demonstrate scalable and secure application hosting on AWS. Configured **Amazon VPC networking, Security Groups, and IAM roles,** while deploying the application on **Amazon EC2** with **Application Load Balancer** and **EC2 Auto Scaling** for high availability. Integrated **Amazon S3** for object storage and **Amazon DynamoDB** for NoSQL data management, applying AWS cloud deployment best practices and service integration. Successfully demonstrated end-to-end cloud deployment using core AWS infrastructure services, strengthening practical knowledge of cloud architecture, networking, and scalable application deployment.

Internships

Technook – Nov 2023 – Jan 2024

Full Stack Software Developer Intern

Developed a full-stack Quiz Portal System to streamline online quiz management and user interactions. Built responsive frontend components using **HTML**, **CSS**, and **JavaScript**, and implemented backend workflows with **Magic**, **Hyperlambda**, and **MySQL** for efficient application logic and database management. Collaborated in an **Agile** team to deliver scalable and user-friendly features.

Certifications

- **Cloud Computing Basics (Cloud 101)** – LearnQuest (Coursera) | Dec 2023
- **Crash Course on Python** – Google (Coursera) | Dec 2023
- **Introduction to Git and GitHub** – Google (Coursera) | Jun 2024
- **AWS Cloud Technical Essentials** – AWS | Jun 2024
- **Introduction to Information Technology and AWS Cloud** – AWS (Coursera) | Jun 2024
- **Providing Technical Support for AWS Workloads** – AWS (Coursera) | Jul 2024
- **Developing Applications in Python on AWS** – AWS (Coursera) | Aug 2024
- **Harnessing the Power of Data with Power BI** – Microsoft (Coursera) | Aug 2024
- **Preparing Data for Analysis with Microsoft Excel** – Microsoft (Coursera) | Sep 2024
- **Skills for Working as an AWS Cloud Consultant**– AWS (Coursera) | Jul 2026
- **Hands-on Introduction to Linux Commands and Shell Scripting** – IBM (Coursera) | Jun 2026

Publications

Advanced Database Testing and Verification Using Automated Tools and Vulnerability Analysis
Presented at the 4th IEEE DELCON 2025 – International Conference on Recent Smart Technologies in Engineering for Sustainable Development, Jamia Millia Islamia, New Delhi (Oct–Nov 2025).
Proposed an automated framework for database testing using symbolic execution, mutation-based testing (DBGriller), and semantic analysis to detect SQL injection vulnerabilities. The solution enhances database reliability, strengthens security, and supports CI/CD pipeline integration.

CORE SKILLS

Technical Skills
Languages: Python, JavaScript, Java, C++, SQL
Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, EJS
Backend: Node.js, Express.js
Databases: MySQL, MongoDB, PL/SQL
Cloud: Linux, Bash, AWS
Analytics: MATLAB, Power BI
Tools: Git, GitHub, AutoCAD
Concepts: OOP'S, Data Structures, OS, DBMS, Computer Networks, Distributed Systems

Soft Skills
Interpersonal Skills: Effective Communication, Active Listening, Professional Etiquette
Team & Collaboration: Agile Collaboration, Teamwork, Cross-functional Coordination
Analytical Abilities: Problem Solving, Critical Thinking, Requirement Analysis
Work Ethic: Time Management, Task Prioritisation, Accountability
Personal Traits: Adaptability, Quick Learning, Attention to Detail
